DESCRIPTION

Aspiring engineer with a passion for technology, object-oriented programming, and project management. I am seeking a responsible project role combining project management, software development, and data-related work, where I can contribute both technically and organizationally to impactful, real-world projects.

PROFESSIONAL EXPERIENCES

Software Engineer

Paris, France

Naval Group

08/2023 - 07/2025

At Naval Group, an industrial group specializing in naval defence, I developed with my team a software solution in **Java** to control electromagnetic emissions from surface vessels. My role involved:

- Developing the software in Java, integrating the back-end system with front-end technologies (HTML, CSS, JS)
- Managing the project's progress using GitHub, creating UML diagrams, and setting up CI/CD pipelines to streamline development and deployment.
- Applying design patterns (*Factory*, *Singleton*, *Observer*, *Strategy*) to enhance code modularity, maintainability, and scalability.
- Optimizing and restructuring the database to improve performance and scalability, ensuring data integrity and quick access.

Technical environment: Java, NodeJs, GitHub, CI/CD, Eclipse, Databases, UML diagrams

Hardware/Software R&D Engineer

Saint-Quentin-En-Yvelines, France

Expleo Group

04/2022 - 08/2023

Development of an Autonomous Driving Test Platform. My role involved:

- Integrating various sensors to enable autonomous vehicle testing, ensuring accurate data collection and processing.
- Designing components using Fusion 360 for precise mechanical and electrical integration.
- Developing a system to monitor and read battery charge via CAN bus, enabling real-time diagnostics.

Technical environment: C++, Electronics, Fusion 360, CAN, Jetson Nano

EDUCATION

Engineering Degree

Paris, France

Leonard de Vinci Graduate School of Engineering

2022 - 2025

General Engineering with a Fintech Major. Acquired work methodologies through computer science projects (Python, Rust, Kotlin, Java), including data analysis and data visualization in python, as well as in mathematics and cryptography.

Technical environment: Project Management, Docker, Mathematics, WSL, Python (Scikit-learn, TensorFlow, Pandas, Numpy, Matplotlib).

Electrics and Electrical Engineering 2 years Diploma

Cachan, France

Cachan Institute of Technology

2020 - 2022

Applied Electronics and Computing Sciences

Technical environment: C++, electronics, circuit design, microcontroller, Altium Designer, Solidworks, LTspice.

LANGUAGES

French Native
English Proficient
Spanish Intermediate

SKILLS

Programming

Java · C++ · Matlab · Python · VHDL · SQL

Frameworks & Libraries

Spring Boot · Maven · NumPy · Pandas

Operating Systems

Linux · Windows · WSL

Tools & IDEs

Git · Eclipse · VS Code · Docker · LaTeX

Project & Workflow

Agile · Scrum basics

Electronics & Simulation

LTspice · Quartus · ModelSim

INTERESTS

Sports (running, swimming, basketball)

Arts

Gardening

Traveling

Cooking
